Signal Processing 54 (1996) 321–322

SIGNAL PROCESSING

Cumulative contents of Volume 54

Volume 54, No. 1, October 1996

Papers

T. Greiner
Orthogonal and biorthogonal texture-matched wavelet filterbanks for hierarchical texture analysis 1
C.-C. Feng and C.-Y. Chi
Design of Wiener filters using a cumulant based MSE criterion 23
M.G. Chandra and S.V. Narasimhan
Exponential power estimation (EPE) based adaptive equalization for stationary and time varying channels 49
D. Gerlach and A. Paulraj
Base station transmitting antenna arrays for multipath environments 59
T. Pogány
Statistical estimation of the bandwidth from irregularly spaced data 75
H.M. Ozaktas
Repeated fractional Fourier domain filtering is equivalent to repeated time and frequency domain filtering 81
E. Mumolo and A. Carini
A stability condition for adaptive recursive second-order polynomial filters 85
S. Boussakta and A.G.J. Holt
A novel combination of NTTs using the MRC 91

Fast communications

S.H. Low and Y.C. Lim
Design rules for rectangular 2-D FIR low-pass filters 99
W. Philips
A comparison of four hybrid block/object image coders 103

Volume 54, No. 2, October 1996

Papers

J. Gark Choi and S.-D. Kim
Multi-stage segmentation of optical flow field 109
T.-B. Deng
Decomposition-based design of linear phase 3-D digital filters 119
E.M. Saad and H.A. Elewa
On the analysis and design of high-speed digital filter suitable for MDSP implementation 129
S.-C. Pei and T.-L. Luo
Split-radix generalized fast Fourier transform 137
D. Grenier and É. Bossé
A new spatial smoothing scheme for direction-of-arrivals of correlated sources 153
I. Santamaría-Caballero, C.J. Pantaleón-Prieto and A. Artés-Rodriguez
Sparse deconvolution using adaptive mixed-Gaussian models 161

Elsevier Science B.V.

M.-C. Yang and J.-L. Wu
A novel interpretation of the two-dimensional discrete Hartley transform 173
J. Xi and J.F. Chicharo
A new structure for the running discrete Hartley transform 179

Fast communications

M.R. Pickering, M.R. Frater, J.F. Arnold and M.W. Grigg
An error concealment technique in the spatial frequency domain 185
K.N. Plataniotis, D. Androutsos, A.N. Venetsanopoulos and D.G. Lainiotis
A new time series classification approach 191
M. Ropert, F. Moreau de Saint-Martin and D. Pelé
A new representation of weighted order statistic filters 201

Volume 54, No. 3, November 1996

Papers

T.L. Dixon and L.H. Sibul
Wideband imaging and parameter estimation of distributed objects using the continuous wavelet transform 207
L.-C. Lin and C.-C.J. Kuo
On theory and regularization of scale-limited extrapolation 225
A. Ferrari, C. Theys and G. Alengrin
Polynomial-phase signal analysis using stationary moments 239
H.-C. Chiang and J.-C. Liu
A novel DCT-based prefilter structure for efficient digital filter design 249
K.M. Reddy and V.U. Reddy
Analysis of interpolated arrays with spatial smoothing 261
S.-C. Pei and J.-J. Shyu
Design of two-dimensional FIR digital filters with specified magnitude and group delay responses by analytical least-squares method 273
K. Barton, I.R. Johnson, S.J. Shepherd and P.W.J. van Eetvelt
Similation and analysis of the distortion generated by the bulk-FFT demultiplexer 285
D.P. Mukherjee, P. Pal and J. Das
Sodar image segmentation using fuzzy *c*-means 295

Fast communications

L. Izzo and A. Napolitano
Higher-order cyclostationarity properties of sampled time-series 303
J. Bae, S.I. Park and I. Song
A known-signal detector based on ranks in weakly dependent noise 309

Calls for papers 315
